

Exploratory Data Analysis

On MTA Transit Data

Proposal and Purpose

- Optimal windows for repairing and replacing turnstiles with least impact on commuters
- Identifying which months have lowest overall traffic
- Identifying stations with multiple turnstiles, allowing replacements to happen without significant impact

Preliminary Findings

- Graph shows the total average entries and exits by month for 2019

Comparing Trends

- Here we performed the same analysis for the top and bottom 10 stations, based on total yearly traffic.
- Best window seems to be Dec-Mar

Number of Turnstiles

- Stark Difference in number of turnstiles for each station.
